SE-327 Web Engineering: Class Task 1

Topic	HTML forms (HTML only, no CSS)
Files to submit	add-product.html and result.html
Total marks	20

Task

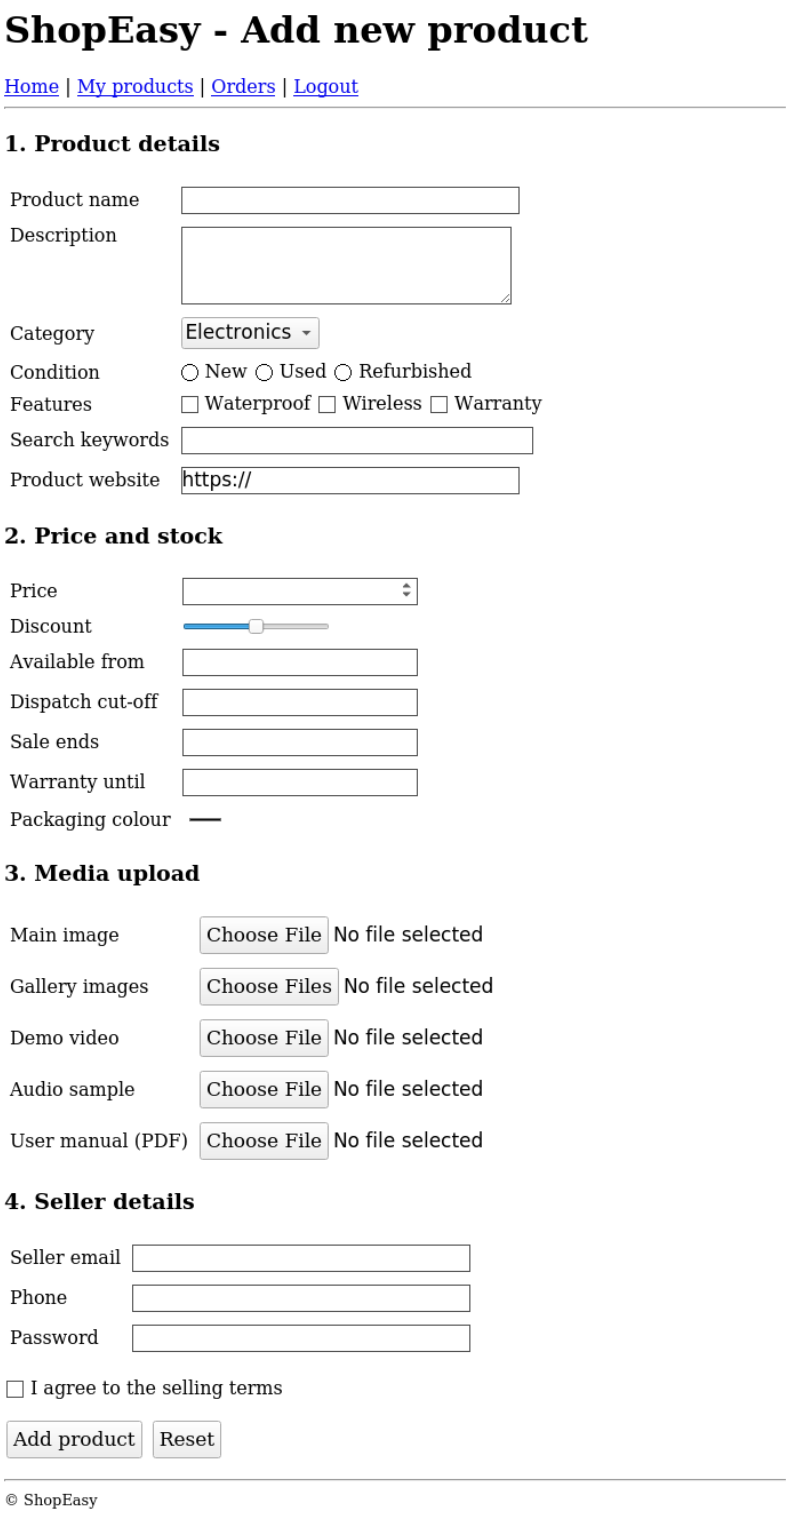

Design the two web pages shown on the next pages. Copy the layout as closely as you can. Both pages must look like real web pages with a heading, navigation links, sections, and a footer.

Rules

1. Do not use any CSS. No <style> tag and no style attribute. The pages must have the plain default browser look shown in the images.
2. Use only HTML tags such as headings, tables, links, paragraphs, horizontal lines, and form elements.
3. The form must contain a field for every item shown in Screen 1. Choose the correct input type for each field yourself.
4. Use labels, name attributes, placeholders, and required fields properly.
5. When the user clicks "Add product", the browser must go to result.html and show the data that was submitted, as in Screen 2.
6. Uploaded images, video, and audio must be shown as a real preview on the result page, not only as a file name.
7. Keep both files in one folder and name them exactly as given.

Screen 1: add-product.html (the form page)

Students must design this page. Every field in the image must be in the form.

Screen 2: result.html (the result page)

This page opens after the form is submitted. It shows the data the seller entered and previews of the uploaded files. The values in the image are only examples.

Product details

Product name	Wireless headphones
Description	Noise cancelling, 30 hour battery
Category	Electronics
Condition	New
Features	Wireless, Warranty
Search keywords	headphones, audio
Product website	https://shop.com
Price	$120
Discount	10%
Available from	2026-10-05
Dispatch cut-off	17:00
Sale ends	2026-11-01 23:59
Warranty until	2028-10
Packaging colour	#378ADD
Seller email	seller@mail.com
Phone	0300 1234567
Password	********

Uploaded media

Main image	
Gallery images	
Demo video	
Audio sample	
User manual	manual.pdf
